Are your people, and organisation going through, or about to go through, a period of significant change?

- Merger or Aquisition
- Business Repositioning
- Organisational or Team Restructure
- Culture Transformation
- Rapid Growth Curve

Change affects everyone in the organisation and the most common challenges faced by leaders and their teams are

- Lack of, or poor communication.
- Resistance/failure to embrace new ways of working.
- Silo working.

Emergenetics is so much more than a psychometric tool.

- From a psychological point of view, the key drivers responsible for these behaviours at work are largely rooted in cognitive dissonance, heuristics and biases, often at an unconscious level.
- Emergenetics helps you and your team learn more about your thinking and behavioural preferences so you can embrace your differences, build on your strengths and realise your own and your teams' full potential.

Virtual or Classroom

Our
**Meeting of the Minds
Team Workshops**
help your people to

- increase self awareness.
- Embrace cognitive diversity.
- Build trust and respect in teams.
- Create a positive, common language.
- Increase collaboration.
- Embed strength-based cultures.
- Drive productivity and results.
